Madiun, Indonesia

Informatics Engineering graduate (GPA 3.79) with strong capabilities in software engineering, system design, and data driven solutions. Experienced in developing web based systems, designing application workflows, and building machine learning and AI solutions. Adept at bridging business needs with technical implementation. Eager to contribute, learn, and grow as an IT professional in a dynamic and challenging environment.

Work Experiences

PT. Salam Pacific Indonesia Lines - **Surabaya, Indonesia** Feb 2024 - Jun 2024

Software Engineer Intern

PT Salam Pacific Indonesia Lines (SPIL) is one of Indonesia's largest technology-driven container shipping companies, serving more than 40 ports nationwide and continuously innovating to enhance logistics and maritime services.

- Conducted user and stakeholder interviews to gather requirements for internal HR applications, including Employee Onboarding, CI/OPI (Continuous Improvement/Operational Process Improvement), and other HR related systems.
- Designed end-to-end application workflows and system flow diagrams, translating business needs into structured user flows.
- Created UI/UX designs and interactive prototypes using Figma, iterating based on feedback from users and stakeholders.
- Developed functional web based prototypes to demonstrate system behavior prior to IT handover.
- Presented designs and prototypes to users and stakeholders, securing approval before handing over finalized projects to the IT development team.

Education Level

Universitas Pembangunan Nasional Veteran Jawa Timur - **Surabaya, Indonesia** Aug 2021 - Dec 2025

Bachelor of Informatics, 3.79/4.00

- Achieved a GPA of 3.79 / 4.00
- Relevant Courses : Artificial Intelligence, Machine Learning, Pattern Recognition, Image Processing, Computational Statistics, Database Systems, Algorithms & Data Structures, web programming.
- Thesis: Kidney Stone Classification Using Swin Transformer Architecture (Implemented and deployed a Swin Transformer model for medical image classification, including data preprocessing, model training, hyperparameter tuning, performance evaluation classification metrics and Flask based web inference).

Bangkit Academy (led by Google, GoTo, Tokopedia, and Traveloka) Aug 2023 - Dec 2023

Machine Learning Cohort

- Completed over 900 hours of intensive training in Machine Learning, Python, TensorFlow, and data processing.
- Collaborated in a cross-functional capstone team (ML, Android, Cloud) to develop a Soil Type Detection and Crop Recommendation Application.
- Applied data preprocessing and hyperparameter tuning to enhance model performance.

Organisational Experience

Himpunan Mahasiswa Teknik Informatika (Himatifa) Mar 2022 - Dec 2022

Public Relation

- Built and maintained partnerships with internal and external student organizations to support collaborative initiatives.
- Managed communication channels and facilitated coordination within the Informatics student community.
- Supported programs aimed at developing students' interests and talents in academic and non-academic areas.
- Lead Organizer of Safari Kampus, a comparative study visit event between two student associations, overseeing planning, coordination, and execution.

Corporate Seminar Program Oct 2022 - Nov 2022

Equipment Committe Division

- Planning the necessary equipment and supplies.
- Managed inventory and monitored proper usage of tools and equipment during organizational activities.
- Coordinated team members in managing equipment preparation and distribution for events and activities.

Skills, Achievements & Other Experience

- **BNSP - Junior Web Programmer** (2024): National certification issued by Badan Nasional Sertifikasi Profesi (BNSP), validating competence in web development fundamentals including HTML, CSS, JavaScript, PHP, and database management

- **IBM SkillsBuild – Artificial Intelligence Fundamentals (2026)**: Certification covering foundational concepts in artificial intelligence, machine learning, and real-world AI applications.
- **Machine Learning & AI**: Machine Learning, Deep Learning, Natural Language Processing (NLP), Computer Vision, Feature Engineering, Model Training, Hyperparameter Tuning, Model Evaluation
- **Libraries & Tools**: TensorFlow, Scikit-learn, Pandas, NumPy, Jupyter Notebook, VS Code, Microsoft Excel, Microsoft Word
- **Soft Skills**: Analytical Thinking, Problem Solving, Collaboration, Adaptability, Time Management
- **Languages**: Indonesian (Native), English (Professional Working Proficiency)
- **Programming & Development**: Python, SQL, PHP, JavaScript, Flask, Git
